PROFESSIONAL SUMMARY

.NET Backend Developer with around 2.4 years of experience designing, developing, and maintaining enterprise web applications and RESTful APIs using C#, ASP.NET Core, ASP.NET MVC, Razor Pages, and .NET Framework. Experienced with Entity Framework Core, Dapper, ADO.NET, LINQ, and SQL Server, including API integration, SOAP-to-REST modernization, authentication and multi-factor authentication (MFA), and PDF report generation. Familiar with Microsoft Azure and SOLID principles, with a focus on building secure, maintainable software.

SKILLS

Programming Languages: C#, SQL, JavaScript, HTML, CSS, Java

Frameworks & Technologies: ASP.NET Core, ASP.NET Core Web API, ASP.NET MVC, ASP.NET Core Razor Pages, .NET Framework 4.8, .NET 9, Entity Framework Core, Entity Framework, LINQ, Dapper, ADO.NET, QuestPDF

API & Web Services: RESTful APIs, SOAP APIs (.asmx), Web API, API Development, API Integration, Authentication (Login, Registration, MFA), Postman

Database: SQL Server 2022, SQL Server 2019, MySQL, Stored Procedures

Cloud & Deployment: Microsoft Azure, Azure App Service

Development Tools: Visual Studio, Visual Studio Code, GitHub Desktop, GitHub, SQL Server Management Studio (SSMS)

Backend Concepts: Dependency Injection, Asynchronous Programming (async/await), Middleware, Authorization

PROFESSIONAL EXPERIENCE

Webority Technologies

.NET Developer / Backend Developer | June 2024 – Present | 2.4 Years

Project: DPSG School, Ghaziabad

Duration: October 2024 – February 2025

Developed a web-based school management application using ASP.NET Core Razor Pages, building application workflows, business logic, database integration, and user-facing functionality for school operations.

- Developed web application modules using **ASP.NET Core Razor Pages** and **C#**, implementing server-side business logic, form handling, and validation.
- Developed and integrated **RESTful APIs** for application data exchange and backend operations.
- Designed and implemented **SQL Server** database operations, using **Entity Framework** for data access, querying, and data manipulation.
- Developed reusable backend components, implemented error handling and debugging across Razor Pages, business-logic, and database layers, and collaborated with development and testing teams.

Technology Stack: C#, ASP.NET Core, Razor Pages, REST APIs, SQL Server, Entity Framework, JavaScript, HTML, CSS

Project: Lightning Protection Risk Assessment Suite

Duration: March 2025 – October 2025

Developed a web-based lightning protection risk assessment application based on the IEC 62305-2:2024 standard.

- Developed application architecture and backend functionality using **C#, .NET 9, and ASP.NET Razor Pages**.
- Implemented risk assessment calculation logic based on **IEC 62305-2:2024** rules and developed multi-step wizard-based forms for data collection.
- Designed normalized **SQL Server** database structures and integrated **Entity Framework Core** for data access.
- Implemented validation and exception handling to improve calculation accuracy and reliability; developed dynamic risk graphs and structured risk assessment reports with safety recommendations.

Technology Stack: C#, .NET 9, ASP.NET Razor Pages, SQL Server 2019, jQuery, Entity Framework Core, Microsoft Azure, GitHub

Project: FoodMe Restaurant Management Application

Duration: November 2025 – July 2026

Contributed backend development to an enterprise restaurant management ecosystem supporting Customer, Manager, Super Admin, and Tempo Dispatch applications across 200+ restaurants and 300+ locations in Canada.

- Developed and enhanced backend functionality in **C# and .NET Framework 4.8**, including **REST API** endpoints for menu management, order processing, and customer workflows, and supported SOAP (.asmx) to REST migration.
- Built delivery failure recovery workflows, including order recreation and reassignment when a delivery fails.
- Implemented data operations using **SQL Server** queries, stored procedures, and **Entity Framework**.
- Implemented **MFA using Twilio** SMS-based verification; investigated and resolved production issues across API, backend, and database layers through debugging and root-cause analysis.

Technology Stack: C#, .NET Framework 4.8, SQL Server 2019, Entity Framework, SOAP Web Services (.asmx), REST APIs, Azure, GitHub

Project: Lumex – SaaS-Based Lightning Protection Product

Duration: August 2026 – Present

Built the **Customer API** for Lumex, a SaaS-based lightning risk assessment platform for IEC 62305-2:2024.

- Implemented **Customer API** functionality for the Clients, Projects, Assessments, Reports, Reviews, Inspections, and Team modules.
- Implemented user account workflows including **registration, login, and forgot password**.
- Developed **assessment calculation** functionality, **team management** features, and **MFA**.
- Built custom report generation using **QuestPDF** and implemented the report approval flow after assessment.

Technology Stack: C#, .NET, REST APIs, SQL Server, QuestPDF

EDUCATION / QUALIFICATION

SRM Institute of Science and Technology (SRMIST) Master of Computer Applications (MCA)	Chennai 2025 – Present
Dr. K. N. Modi Institute of Engineering & Technology Bachelor of Computer Applications (BCA)	Modinagar 2021 – 2024
Jehanabad College Intermediate (Higher Secondary)	Jehanabad 2019 – 2021
Utkramit Madhyamik School High School (Secondary)	Narma 2018 – 2019
